

3) Create a simple cloud software application for property buying and rental process using any cloud service provider.

Ans:-

The procedural steps for creating a simple cloud software application for property buying and rental process.

1. choose a cloud provider:-

There are different cloud provider such as Amazon web service microsoft Azure and zoho so we can choose any one of them.

2. create an account:-

Now creator and enter the application name as "property buying and rental process".

3. create new application:-

These different types of template already available so we can choose for them or we can create a new template according to the topic.

4. Select one form:-

These are different types of forms available so we can choose any one of the form according to the application software has been created.

After choosing the form we can edit the form and add any additional features such as currency , date and etc.

and finally click on one to that the software has been created.

### Result:

The final result of the application is that the date which were entered to the form by the user is displayed in a certain order and we can able to see the date.
