

1. Create a simple cloud software application and provide it as a service using any cloud service provider to software as a service (SaaS).

Aim:
The procedural steps for creating a simple cloud software application. \Rightarrow Aim:

1. choose a cloud provider:-

There are many cloud provider such as Microsoft Azure, Amazon web services and zoho choose any cloud providers.

2. Create the Account:

After choosing the cloud provider such as zoho and sign up the free account.

3. Select an Application:-

Now choose the creator and enter the topic for which you are going to create and select create from scratch and enter the application name.

4. Enter the Application name,

Now enter the application name and select create new form.

5. Create new application:-

There are "n" number of template so we can choose from them or we can create a new template.

6. Select one form:

There are different forms select any one from those forms and add any additional feature belong to the topic.

7. Software has been created:

Now the software has been created and enter the details of user which is created above form.

Result:

Now we are able to see the information that is entered by the user
