

5) create a simple cloud software application for a library book reservation system using any cloud service provider

Ans: The procedural steps for creating a simple cloud software application for a library book reservation system.

1. choose a cloud provider:

There are different cloud providers such as microsoft Azure, Amazon web services and Zoho etc from these cloud providers choose any one of them.

2. create an account:

I have zoho cloud provider and created a account so that I can access the features of cloud.

3. select one Application:

now click on select and enter the Application name as library book reservation system!

4. create new Application:

now we have to choose a template according to the application which are already exist or else we can create a new template.

5. select form:

There are some different forms we need to choose any one of them.

Software has been created:

now we can edit the form according to the application such as adding or removing features and finally click on done so that the software has been created.

Result:

The final result of the application we can see the data which were entered by the user in a certain order.
